FleetCarma **C2**

A plug-and-play vehicle monitoring solution.

The FleetCarma C2 is a lightweight cellular data logger that clips into the OBD-II port and is compatible with all conventional vehicles.

Features

> Integrates with FleetCarma web portal for real-time vehicle status & location, along with historical energy, location, and vehicle diagnostics

> Interfaces with J1979 OBD-II data

> Includes logging of GPS coordinates, speed, and elevation

> Robust fuel monitoring and vehicle mode support for diesel, gasoline, and hybrids

> Low power consumption (draws <0.1 W during rest)

> Ability to retrieve custom signals

> Compatible with all CAN and Legacy protocols dating back to 1996

Installation

> Simple integration by plugging into the OBD-II diagnostic port

> Automated setup via VIN retrieval

Connectivity

> Quad-band GSM/GPRS module

Dimensions

> 52.6mm x 48.3mm x 23.6mm / 2.1" x 1.9" x 0.9"
